

Erundu Ogechi Emmanuel

SOFTWARE ENGINEER & SYSTEMS INTEGRATION SPECIALIST

Lagos, Nigeria +234 816 628 9825 erone007@gmail.com [LinkedIn](#) [GitHub](#)

PROFESSIONAL SUMMARY

Results-driven Software Engineer with 5+ years of experience building scalable systems, designing multi-service integrations, and automating complex workflows across web and mobile platforms. Strong background in API design, trigger/action pipeline architecture, and real-time data synchronization between SaaS and custom services. Experienced shipping production systems that integrate payment gateways, cloud messaging, and third-party APIs. Comfortable working in hybrid AI + human environments and evaluating automated workflows for accuracy, reliability, and fault tolerance. Upper-intermediate to fluent English proficiency; self-directed with a strong attention to data integrity and process quality.

CORE SKILLS

AUTOMATION & INTEGRATION

REST API Integration

Webhook Design

GraphQL

CI/CD Pipelines

Data Sync

Event-driven Workflows

FRONTEND & MOBILE

Flutter

Dart

React

TypeScript

Riverpod

TanStack Query

BACKEND & CLOUD

Node.js

Express

Laravel

Prisma ORM

Firebase

AWS

MySQL

PostgreSQL

AI & TOOLING

LLMs

AI Workflow Integration

Prompt Engineering

Git

Zod Validation

TDD

Full-Stack Engineer & Platform Architect

Jan 2025 – Present

PetOrbit , Freelance / Founder, Lagos, Nigeria

- Architected and built a multi-vendor pet services marketplace from scratch, covering vendor onboarding, product listings, bookings, orders, and admin management across three separate platforms (API, web, admin panel).
- Designed and implemented a 57-endpoint REST API using Node.js, Express, and Prisma ORM with role-based access control, JWT authentication, and structured error handling.
- Built an automated commission calculation engine that triggers on every order creation, extracting the vendor's active subscription plan, computing platform commission, and storing payout values with zero manual intervention required.
- Designed a multi-step vendor KYC verification workflow (3 levels: auto, government ID, business document) with per-level document upload, admin review, and automated status progression.
- Integrated Paystack payment gateway via webhook-driven events for initialize/verify/payout flows, ensuring reliable data synchronization between payment state and order records.
- Integrated Firebase Cloud Messaging for push notification delivery across web and mobile clients; designed device token registration and notification dispatch pipeline.
- Eliminated N+1 database query patterns using Prisma groupBy aggregations, reducing analytics endpoint load from 23 sequential queries to a single round-trip.
- Built a React web PWA and a 18-page React admin panel with TanStack Query, Zustand, and Zod validation, deployed alongside the Node.js API backend.
- Implemented search sanitisation, mass-assignment whitelists, CORS policy controls, and Prisma error suppression to ensure data accuracy and system security at all API boundaries.

Senior Mobile Developer

Aug 2022 – Dec 2024

First Ally Capital , Lagos, Nigeria

- Designed and built scalable fintech mobile applications in Flutter with real-time data integration across multiple financial service APIs.
- Spearheaded architecture decisions for data flow between mobile client, backend services, and third-party financial data providers, ensuring accuracy and consistency across system boundaries.
- Implemented automated testing pipelines (TDD) and CI/CD workflows, reducing regression incidents and shortening release cycles.
- Profiled and optimised critical data synchronisation paths, resulting in a 40% improvement in user retention, traced to faster load times and fewer data fetch errors.
- Led code review processes to enforce clean, maintainable integration patterns across the team.

Mobile Developer

Jan 2022 – Aug 2022

Bravetech Media , Lagos, Nigeria

- Built cross-platform media management applications with real-time data sync via RESTful API integration and efficient GraphQL querying.
- Designed and deployed automated delivery pipelines using CI/CD on AWS, reducing manual deployment steps and improving release reliability.
- Integrated multi-source content pipelines, synchronising media metadata and user data across distributed services in real time.

Flutter

GraphQL

AWS

CI/CD

Mobile App Engineer

Dec 2020 – Aug 2022

News Central Television , Lagos, Nigeria

- Developed a Flutter news application integrating live video streaming and on-demand content via REST API pipelines with a WordPress CMS backend.
- Designed data flow between live broadcast systems and the mobile client, handling real-time event triggers for breaking news and content updates.
- Improved system stability through automated testing and debugging, leading cross-functional collaboration between design, backend, and QA teams.

KEY PROJECTS

PetOrbit: Multi-Vendor Pet Marketplace (Nigeria)

End-to-end marketplace platform covering vendor onboarding (KYC workflows), subscription billing, automated commission processing, booking management, and payment integration. Three independently deployed systems: REST API, customer web app (PWA), and admin panel, all sharing a single MySQL database with strict role-based data access.

- Node.js
- Prisma
- React
- Flutter
- Paystack
- Firebase
- MySQL

Fintech Mobile Platform, First Ally Capital

Scalable investment and financial services app with real-time data sync across multiple financial APIs. Integrated automated CI/CD pipelines to maintain continuous delivery. Performance profiling resulted in measurable 40% improvement in user retention metrics.

- Flutter
- Firebase
- REST
- CI/CD

EDUCATION

Bachelor of Technology in Logistics and Transport Technology

2016

Federal University of Technology, Owerri, Imo State

CERTIFICATIONS & COURSES

Enhanced Due Diligence on High-Risk Customers and Products
