

EMMANUEL ERONDU

SENIOR SOFTWARE ENGINEER

ABOUT ME

As a Senior Software Engineer with over 6 years of experience, I specialize in developing cross-platform applications, as well as robust backend systems. My expertise includes Flutter, Dart, C#, PHP, JavaScript, SQL databases, Firebase, AWS, API integration, and real-time communication tools. I am dedicated to delivering modern designs, responsive user interfaces, secure API integrations, and scalable solutions that comply with industry standards and regional requirements. I prioritize quality and limit my workload to ensure each project receives meticulous attention.

EXPERIENCE

MyInvestar – Save and Invest

First Ally Capital LTD, Nigeria | Senior Flutter Engineer | 2022-2024

- Led the frontend development of **MyInvestar**, a fintech app by First Ally Asset Management.
- Transformed Figma designs into Flutter-based UI with 90%+ accuracy, providing a sleek and functional user interface.
- Reduced signup drop-offs by 50% (from 65% to 15%) and boosted user engagement by 40% through identifying and fixing key bugs using Firebase Crashlytics.
- Collaborated closely with cross-functional teams to implement UI logic and ASP.Net API integration, enhancing overall app performance and user experience.

Divine Connection

The Encouragers Inc. US | Full stack Software Engineer | 2022-2023

- Spearheaded the development of Divine connection, A Christian Dating App that helps Christian singles to connect with each other, including search, swipe, chat
- Features included liveness detection, **machine learning powered** nudity and profanity detection, firebase analytics and push notifications
- Wrote 2nd gen. Firebase Cloud functions that utilized a user recommendation algorithm that improved user suggestions based on interests.

Brave Media Asset Management

BraveTech Media | full Stack Software Engineer | 2022

- Spearheaded the development of Brave, a media asset management app for news and TV production using Laravel (PHP), improving workflow efficiency by 30%.
- Integrated key features including scheduling, ticketing, mileage tracking, and studio booking, reducing manual processes by 45%.
- Deployed the application for **Multichoice NG** using AWS EC2 and RDS, ensuring scalability and uptime.

NC News Ticker Publisher

News Central Television, Nigeria | Lead Software Engineer | 2022

- Developed a cloud-based Content Management System (CMS) using PHP, enabling users to remotely update and manage content with real-time synchronization across all platforms.
- Integrated real-time data polling capabilities using VB.NET, ensuring immediate updates and seamless data flow within the application.
- Implemented a News Ticker publishing system, allowing dynamic content updates and real-time display of news items across various platforms.

News Central TV Mobile App

News Central Television, Nigeria | Lead Software Engineer | 2021

- Developed a Flutter-based news app that fetched real-time data from WordPress REST API, improving the production workflow for journalists by 40%.
- Integrated RTMP stream playback and VOD functionality for seamless content delivery.
